

# TAPAS DEY

## BACKEND DEVELOPER

deytapas374@gmail.com | github.com/deytapas | linkedin.com/in/tapas-dey-561838225 | +91 7365005415 |

### PROFESSIONAL SUMMARY

Software Engineer with 3 years of experience building scalable backend systems and eCommerce integrations. Specialized in Node.js, TypeScript, and API-driven architectures. Proven track record of improving system performance, reducing onboarding time, and delivering measurable business impact through automation and optimization

### CORE SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, C
- **Frontend:** React.js, Next.js, Redux Toolkit, HTML5, CSS3, Tailwind CSS
- **Backend:** Node.js, Express.js, GraphQL
- **Database:** MongoDB, PostgreSQL, MySQL, Prisma ORM, Redis
- **Tools:** Git, GitHub, Postman
- **Messaging & Queues:** RabbitMQ, BullMQ
- **Concepts:** REST APIs, Webhooks, JWT Authentication
- **DevOps & Cloud:** Familiar with Docker, CI/CD, AWS (EC2, S3, IAM)

### PROFESSIONAL EXPERIENCE

#### Full Stack Developer

July 2026 – Present

Ira Technologies India Pvt. Ltd, Noida

- Building and maintaining backend services as part of the full stack development team, using Node.js and Express.js
- Working with MongoDB for application data and Redis for caching and performance optimization
- Implementing background job processing and task queues using BullMQ for asynchronous workflows

#### Software Engineer

January 2023 – January 2026

Webkul Software Pvt. Ltd, Noida

- Developed and maintained scalable backend services using Node.js and MongoDB, supporting 100+ active merchant stores with high availability
- Developed React-based merchant management interfaces for product, inventory, and order synchronization.
- Built and deployed API-driven eCommerce integrations, reducing client onboarding time by ~40% through workflow automation
- Designed and implemented REST APIs and webhook-based systems for real-time data synchronization, achieving <200 ms average response time
- Optimized MongoDB queries and backend performance, reducing query execution time by ~35%
- Resolved 20+ client issues per month, maintaining 95%+ customer satisfaction
- Collaborated with cross-functional teams to deliver scalable product features on schedule
- Mentored 2 junior developers and conducted internal sessions on Node.js best practices
- Designed event-driven architectures using webhooks for efficient and scalable integrations

### KEY PROJECTS & ACHIEVEMENTS

#### Survey & Communication Platform – Ira Technologies

- Developed backend services using Node.js, Express.js, MongoDB, and Redis for a scalable survey platform.
- Implemented asynchronous processing with BullMQ and Redis for reliable background workflows.
- Designed webhook-driven integrations for real-time communication and event processing.
- Worked on Twilio-based voice/WhatsApp integrations with secure webhook handling and asynchronous event processing.

#### BigCommerce–Etsy Connector

- Built a multi-platform integration enabling seamless store management across platforms
- Achieved adoption by 50+ sellers within 3 months, demonstrating strong usability and demand

#### Shopify–SAP B1 Integration

- Developed end-to-end integration to sync products, categories, and customers between systems
- Reduced manual effort by ~60% and eliminated daily reconciliation errors

#### Auction & Multi-Vendor Systems

- Built real-time bidding and multi-seller workflows with scalable backend architecture
- Increased client GMV by ~25% through improved engagement and optimized transaction flows

### EDUCATION

- **MCA – Master of Computer Applications**  
Lovely Professional University, Punjab

CGPA: 8.08 | 2021 – 2023

- **BCA – Bachelor of Computer Applications**  
Panskura Banamali College, West Bengal

CGPA: 8.18 | 2018 – 2021
